Crédit Agricole Leasing & Factoring is launching « CA Truck Care » in France and Germany, a trucks and semi-trailers leasing solution with services

After a successful deployment in Poland, Crédit Agricole Leasing & Factoring (CAL&F) is launching its « CA Truck Care » offer in France and Germany. In an increasingly use-oriented economy, CAL&F supports its clients in the freight transport and warehousing sector, in Europe, with a leasing offer for trucks and semi-trailers with services, a global solution that provides flexibility and serenity.

« CA Truck Care » is a *turnkey* solution for renting new trucks and semi-trailers without any option to buy, incorporating a range of personalised services (maintenance, 24/7 assistance, financial loss insurance and telematics), to secure the entire client contract duration, from equipment rental to return.

This offer is designed both for companies and professionals in the freight transport and warehousing sector (all sizes), as well as local authorities that want to modernise their fleet and optimise the management of their equipment.

« CA Truck Care » combines the rental of high-performance equipment for a negotiated price (over a period of 36 to 48 months), services that can be adapted to the client's needs, and flexibility (possible revision of the *loi de roulage* every anniversary date of the contract); all with a commitment to take back the asset at the end of the leasing contract.

With « CA Truck Care », CAL&F is expanding its Mobility offers to the freight transport and warehousing sector and intends to play a part in transforming this sector. Thus, CAL&F is encouraging its clients to prioritise the economy of use and is gradually supporting them towards a more sustainable mobility.

“

As part of CAL&F's move towards mobility solutions to complete its core business as a financier, the CA Truck Care offer, which is already a great success in Poland (+5,000 vehicles on road) is coming in France and Germany. CAL&F is now offering a rental solution with services to French hauliers, capitalising on its partnerships with manufacturers, and on the experience acquired through its participation in Agilauto (passenger cars and light commercial vehicles - LCVs) and Watèa (e-LCVs). »

Hervé LEROUX, Deputy Chief Executive Officer of Crédit Agricole Leasing & Factoring (Development France, Mobility and Leasing Partnerships Pole)
